To become an Engineering Leader you need to establish clear goals and adhere to certain disciplines to achieve your desired results.

Paul Mracek uses “Warrior Mindset” to bring order to long-established principles and concepts that can lead to career success as an Engineering Leader. He will describe how to apply the equation ... **SUCCESS = Passion + Persistence + Purpose** to propel your career.

Paul’s approach follows a blueprinted process which has been taught and followed for centuries in Asia.

This seminar will give you insights into mastering these principles for the betterment of your professional, business and personal life.

About the Speaker:

Paul Mracek has over 25 years’ experience in Asia, Europe, USA and Australia establishing and building successful businesses. Early in his career Paul was a production engineer and manager and had operational, business development, sales and R&D responsibilities in automotive, electrical, commercial, manufacturing and distribution organisations.

He is a Mechanical Engineer from Monash University, which is complemented by management training at Melbourne University’s Graduate School of Management. He was also MD/CEO for a number of well known multinationals.

Paul now has his own Coaching & Consulting business. He is author of several books on success, business, balance and how to apply the “Warrior Mindset” to your life. He is an experienced Master Coach, Mentor, Trainer and Consultant supporting businesses and Individuals looking to move to their next level of performance and success ... personally or professionally.

Why “Warrior Mindset”? Well, he is also a 7th Dan Black Belt in Martial Arts!

The key purpose of CELM is to enhance professional opportunities for members of Engineers Australia by developing, recognizing and promoting their ability to participate in and lead business, innovation and change
